Education

2022 - 2026 Bachelor of Engineering (AI&ML) at **BMSIT&M** (CGPA: 8.86/10.0)

Skills

- Programming Languages: Python, C, C++, TypeScript, JavaScript, SQL, HTML, CSS/Tailwind CSS.
- Machine Learning & Data Science: Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas, Matplotlib.
- Cloud, DevOps & Tools: Linux, AWS/GCP Services, Docker, Kubernetes, Git/GitHub, Postman, Jupyter Notebook, CI/CD, Google Colab.
- Concepts: REST APIs and Integrations, Microservices, Software Development Life Cycle (SDLC), SQL and Database Concepts, Object Oriented Programming (OOPs), Computer Networking, Data Structures & Algorithms, NLP, ETL Process, Big Data, React.js, Node.js, Express.js, Redux-Saga, Generative AI, RAG, Agentic AI, LLMs/SLMs, LangChain, Data Engineering & Analytics, GraphQL, Hasura, MongoDB, PostgreSQL & Redis.
- Soft Skills: Problem-solving, Communication Skills, Quick Learner, Teamwork, Adaptability.

Work Experience

Talview Jan 2026 – Sept 2026
Software Developer Intern

- Wrote Python-based automation scripts and backend services to support testing, deployment, and process improvement, and participated in code reviews, followed coding standards, and prepared technical documentation for platform workflows on a Monorepo.
- Developed and maintained enterprise applications across frontend and backend monorepos using React, TypeScript, Redux-Saga, GraphQL, Hasura, and PostgreSQL, delivering features for proctoring, recruitment, exams, scheduling, and platform workflows.
- Integrated AI-powered chat support using Twilio's real-time streaming technology, enabling live communication between candidates, AI assistance, technical teams, and proctors, with voice and video calling capabilities deployed in production for customers globally.

Common Wealth Bank Australia (CBA) July 2025 – Dec 2025
Software Development Trainee

- Gained hands-on training in Python, Full Stack Development using JavaScript, React.js, Node.js, Data Engineering, Cloud Computing, and AI fundamentals and MongoDB, and SQL and Database Concepts while developing a capstone project integrating web technologies and AI.

SISA Information Security June 2025 – Oct 2025
SISA AI Assistant Intern

- Built an advanced Marketing Automation ecosystem using Pardot, Salesforce CRM, n8n automation and WordPress to obtain Full-Stack implementation and Automation & Strategy to achieve higher customers.

Projects

AuditScope 360 – GenAI-Powered Financial Audit Intelligence Platform

- Built a GenAI-powered financial audit platform using Python, vector embeddings, FAISS, RAG frameworks, and LLMs to semantically retrieve accounting benchmarks and generate explainable audit insights.
- Implemented RAG workflows with vector data, semantic embeddings, benchmark retrieval, compliance and confidence scoring, and reinforcement-learning-based knowledge adaptation, achieving an overall model accuracy of 80–90% across evaluated audit scenarios.
- Developed secure report generation and human-in-the-loop feedback workflows, validating the system across clear, fail, borderline, and random audit scenarios.

CipherXPose – AI-Powered Cryptographic Algorithm Detection[Cyber-Security Tool]

- Built CipherXPose using Python and Machine Learning algorithms, achieving over 80% accuracy in detecting 10+ cryptographic algorithms.
- Accelerated cryptographic assessments by 10x and reduced analysis time from hours to minutes for cybersecurity teams.

SafeVision – AI-Powered Intelligent Surveillance System

- Developed SafeVision using Python, TensorFlow, and PyTorch, an AI-powered surveillance system for detecting aggression and distress using Machine Learning, Deep Learning, Computer Vision, and contextual algorithms.
- Designed the system with scalability considerations for smart cities, workplaces, and public spaces.

Certifications

- AI for Investments **NPTEL IIT Kharagpur**
- 100 Days of Python Bootcamp **Udemy**
- Introduction to Cybersecurity **Infosys**
- Python for Beginners: Learn Python Programming **Infosys**
- Julia Programming Language **Infosys**
- Artificial Intelligence with Python – Heuristic Search **Infosys**
- DSA Problem Solving – 5 Star **HackerEarth**
